	Amendments to the Specification:
	Please replace the paragraph beginning on page 2, line 12 with the
	following rewritten paragraph:
: B1	making at least one micro discrete continuous tone image on a
	photosensitive media wherein said discreet continuous tone image is formed on a
	photosensitive media using near-field optics, the continuous tone image being less
	than about .015 mm.
•	
	Please replace the paragraph beginning on page 2, line 17 with the
-	following rewritten paragraph:
BZ	providing a photosensitive media capable of producing a
	continuous image thereon using near-field optics; and
	Please replace the paragraph beginning on page 2, line 21 with the
	following rewritten paragraph:
β3	In accordance with still another aspect of the present invention
	there is provided a product having a plurality of micro discrete continuous tone
	images placed thereon by near-field optics, said continuous tone image each
	having a size no greater than about 20 microns.
